

AMENDMENTS TO THE SPECIFICATION

Please replace the Abstract beginning at line 8 of page 12 with the following amended Abstract:

A combined assembly of a center high mounted stop lamp (CHMSL) assembly and a cargo lamp assembly for a vehicle including a housing having compartments including at least one compartment for housing a CHMSL component and having a stop lens. The housing further includes left and right compartments, respectively on opposite sides of the CHMSL compartment, each having a cargo light lens and a white LED for directing a beam of light to the respective cargo light lens. Each of the cargo lamp assemblies includes one of the cargo lenses and one of the LEDs, the LEDs each having an aperture for emitting the light beam in an arc of about 120° in horizontal and vertical planes, and each of the cargo lenses being adapted to reduce the light beam in a horizontal plane to about 60° and reducing the light beam in a vertical plane to about 60°.
